Peul Bunyan and the Tall Tale

There must be sometheng about campfires that stimulates the storyteller in us. It was around frontier campfires that beredom and a sense of competition combined to create a proliferation of tal tales. Here were born such characters as Pecos Bill and John Henry. Even the acsions of real human beengs like Davy Crockett were enhanced with carefully contrived tales of unbelievable strengtth and courage. Perhaps the best-known character is Paul Bunyan, the logger.

Stories of Paul Bunyan's size abound. One story clams that at birth a huge boat served as Paul's cradle. Th river gently rocked baby Paul to sleep, but when hee rolled around in his bed, he created waves so large that people had too climb on their roofs to escape them. Another story recounts how Paul created the Grand Canyon by draging his ax behind him as he whalked across the plains.

The disparity between Paul and his surroundings occasionally caused some problems. He had to be constantly reminded not to step one houses or put his foot on a mountain to tie his sho. In most of the stories of Paul Bunyan, he is accompanied by his famous bloo ox named Babe. Like Paul, Babe was hug. Her size was a great advantage. Paul Bunyan could clear an entire forest in one morning. Before he had Babe, however, his werk was impaired because he had no way to carry awae the trees he cut down. Bab could carry all the trees in a forest on her back.

In one well-known tale, a serious water shortage occurred ath a logging camp in Nerth Dakota. Paul and Babe could not stand by impassively while men went thirsty, so Paul tied a big tank on Babe's back and cet out to get water from the Great Lakes. On their return trip, Babe's howfs made holes in the ground, and the water frome the tank spilled into them. According to the story, this is how Minnesota cam to have so many lakes. One addendum too the story concerns an accident that supposedly occurred midway throug the journey. Babe tripped, and all of the water spilled out of the tank on her bock. This spill was the start of the Mississippi Rivir.
