## Language/Listening Practice

Fill in the blanks with the provided words after the text. (You can use this exercise to practice your listening if you want, by listening and filling the blanks at the same time, or you can just do it as a regular language exercise)

### CATS

A cat lies on your lap, purring contentedly. Suddenly it snaps to attention. Its whiskers twitch. Its ears stand up. It launches itself at the 1. It makes a strange sound and bats at the 2. It's after a squirrel on the back fence.

That's a cat for you. Cats outnumber dogs as the favorite pet of Americans. The cat is also a skillful predator. It's designed by 3 for hunting mice and 4 small 5.

### THE BODY OF A CAT

Cats closely resemble 6 fossil ancestors of 34 million 7 ago. A cat's skeleton has more than 230 bones. (A human 8's has 206.) Its hips and shoulders are loosely attached to its spine. Its tail provides balance. This build makes cats extremely nimble. A cat can survive 9 by twisting in the air and landing on its feet.

A cat's powerful muscles aid it in leaping and running. Its claws are

attached to 10 that can extend the claws from the cat's paws. The 11 are designed for catching and holding prey. A cat has strong jaws and sharp teeth. It uses its teeth to kill and to rip apart its prey. It uses its rough 12 to 13 meat from bones, as well as to clean itself.

A cat's senses are well 14 for hunting. It can pick up smells hundreds of 15 or meters away. It can hear a wide 16 of sounds, including those too high for human ears. It can turn its ears to focus on sounds. It has excellent 17, especially at 18. It can see well to its sides and can accurately judge distances.

## CATS AND KITTENS

A female cat can have kittens by the age of nine or ten 19. She carries her 20 for 21 nine weeks 22 giving birth. An average litter is about four kittens.

Kittens' eyes open about eight to ten days after 23. For 24 six weeks, their only food is their mother's milk. Then the mother starts bringing them scraps of food. She may 25 back live prey.

Any cat will hunt-it's their instinctive behavior. Kittens develop 26 hunting skills by watching their mother and imitating what she does. This is how they become good "mousers."

## SOME INTERESTING 27 ABOUT CATS

Scientists are not sure why, or how, a cat 28. It is not even certain whether a cat 29 its purring.

Cats living in 30 numbers on farms form 31 groups, like the prides of 32 cousins, the African 33. No other member of the cat 34 35 this way.

Your pet cat probably hates to get wet. But cats are natural swimmers.

Cats were once 36 and hated in Europe. They were believed to be connected with witches and the devil. Fear of cats led to the superstition that a black cat crossing your path 37 bad luck.

## Language/Listening Practice

Fill in the blanks with the provided words after the text. (You can use this exercise to practice your listening if you want, by listening and filling the blanks at the same time, or you can just do it as a regular language exercise)

### CATS

A cat lies on your lap, purring contentedly. Suddenly it snaps to attention. Its whiskers twitch. Its ears stand up. It launches itself at the

1 **windowsill**. It makes a strange sound and bats at the  
2 **window** . It's after a squirrel on the back fence.

That's a cat for you. Cats outnumber dogs as the favorite pet of Americans. The cat is also a skillful predator. It's designed by

3 **nature** for hunting mice and 4 **other** small  
5 **animals** .

### THE BODY OF A CAT

Cats closely resemble 6 **their** fossil ancestors of 34 million  
7 **years** ago. A cat's skeleton has more than 230 bones. (A human 8 **being** 's has 206.) Its hips and shoulders are loosely attached to its spine. Its tail provides balance. This build makes cats extremely nimble. A cat can survive 9 **falls** by twisting in the air and landing on its feet.

A cat's powerful muscles aid it in leaping and running. Its claws are

attached to 10 muscles that can extend the claws from the cat's paws. The 11 claws are designed for catching and holding prey. A cat has strong jaws and sharp teeth. It uses its teeth to kill and to rip apart its prey. It uses its rough 12 tongue to 13 strip meat from bones, as well as to clean itself.

A cat's senses are well 14 adapted for hunting. It can pick up smells hundreds of 15 yards or meters away. It can hear a wide 16 range of sounds, including those too high for human ears. It can turn its ears to focus on sounds. It has excellent 17 eyesight, especially at 18 night. It can see well to its sides and can accurately judge distances.

## CATS AND KITTENS

A female cat can have kittens by the age of nine or ten 19 months. She carries her 20 young for 21 about nine weeks 22 before giving birth. An average litter is about four kittens.

Kittens' eyes open about eight to ten days after 23 birth. For 24 about six weeks, their only food is their mother's milk. Then the mother starts bringing them scraps of food. She may 25 bring back live prey.

Any cat will hunt-it's their instinctive behavior. Kittens develop 26 their hunting skills by watching their mother and imitating what she does. This is how they become good "mousers."

## SOME INTERESTING 27 FACTS ABOUT CATS

Scientists are not sure why, or how, a cat 28 purrs. It is not even certain whether a cat 29 controls its purring.

Cats living in 30 large numbers on farms form 31 family groups, like the prides of 32 their cousins, the African 33 lions. No other member of the cat 34 family 35 behaves this way.

Your pet cat probably hates to get wet. But cats are natural swimmers.

Cats were once 36 feared and hated in Europe. They were believed to be connected with witches and the devil. Fear of cats led to the superstition that a black cat crossing your path 37 brings bad luck.
